You can find words easily because dictionaries put them in alphabetical order. The word "dictionary" comes from the Latin "dicto"('saying'). There are several types of dictionaries. Dictionaries which explain words and how they are used in the same language; this type is simply called monolingual dictionary, dictionaries which translate words from one language to another; dictionaries of biography which tell about famous people; and technical dictionaries which explain the meanings of technical words. Dictionaries which explain what words mean give a clear "definition" of them. A good dictionary also gives more information about words. For instance, it explains how they are pronounced. There are also dictionaries which translate words into other languages. We call them bilingual dictionaries. Very often one volume translates both ways; for example, half of the book is from English to Persian and the other half from Persian to English. When using a dictionary to find out how to say something in another language, one has to be careful to choose the right meaning.</p> <p>a) A word starting with 'm' appears before a word starting with 't' in a dictionary</p> <p>1.True 2.False</p> <p>b) Bilingual dictionaries do not translate words into other languages.</p> <p>1.True 2.False</p> <p>c) The underlined pronoun <u>them</u> in line 2 refers to</p> <p>1. dictionaries 2. words 3. meanings 4. expressions</p> <p>d) Find a definition for monolingual dictionary and write it down.</p> <p>e) What is a technical dictionary?</p>	14
